

ISO 22301 Lead Implementer

Why should you attend?

No two disasters in the world cause equal damage. Between the unpredictability of natural disasters, information security breaches, and incidents of different nature, preparedness can make you stand out in the crowd and predict the future of your business. In light of this, proper planning is essential to mitigating risks, avoiding consequences, coping with the negative effects of disasters and incidents, but at the same time, continuing your daily operations so that customer needs do not remain unfulfilled.

Organizations can make progress towards understanding and managing disasters, incidents, and risks by having a BCMS based on ISO 22301 in place. Therefore, PECB has designed this training course to prepare its participants implement a business continuity management system (BCMS) in compliance with the requirements of ISO 22301. Attending this training course allows you to gain a comprehensive understanding of the best practices of the business continuity management system and to be able to establish a framework that allows the organization to continue operating efficiently during disruptive events.

Why should you attend?

After attending the training course, you can sit for the exam and, if you successfully pass the exam, you can apply for the "PECB Certified ISO 22301 Lead Implementer" credential. The internationally recognized "PECB Certified ISO 22301 Lead Implementer" certificate will prove that you have the professional capabilities and practical knowledge to implement a BCMS based on the requirements of ISO 22301 in an organization
